 **FOUNDATION** software

SOFTWARE OVERVIEW

HI.

Maybe you're actively looking for new accounting software. Or you're curious about what's new in accounting technology. Whatever the reason, we're pleased you've found us!

Since 1985, Foundation Software has focused on developing America's #1 Construction Accounting Software: **FOUNDATION**. We've helped thousands of contractors like you improve their accounting processes, and we hope you enjoy learning about how we can help your business!

BUILT FOR CONTRACTORS

FOUNDATION® was created specifically with contractors in mind, to help them run the business side of construction.

LET'S TALK SUPPORT

Foundation Software provides a variety of support options to help you continue your education and boost your knowledge of the construction industry. From our online self-help videos and tools to our Foundation Academy courses — you'll always be learning with Foundation.

There's a reason why over 25,000 contractors across the United States have trusted Foundation for decades — because we're passionate about providing them with the best service possible. With over three decades of experience exclusively serving the construction industry, we've learned a thing or two.

Our best-in-class, in-house support team is here when you need us. No robots. No outsourcing. We're always here to answer any questions or concerns and do so with an industry-leading response time. You can always count on Foundation to be there for you to help fix your problems before they start.

EXPERT TRAINING

Experienced field trainers assist clients every step of the way, providing on-site, online or our-site training options to meet learning preferences.

ONGOING SUPPORT

You're bound to have questions after training, and we've got you covered with unlimited toll-free phone support, extended support hours and a 24-7 online knowledge book.

PRODUCT UPDATES

New features, reporting and functions can be found in our regular product updates, keeping your system current and up-to-date.

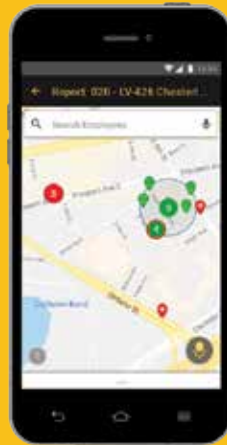

CONTINUING EDUCATION

FOUNDATION users are always learning and have access to consulting services, user conferences, educational webinars, Foundation College and Foundation Academy.

FOUNDATION MOBILE

FOUNDATION mobile® connects your field and office — enabling the entry of time, material transfers, equipment usage, quantities complete, notes and weather conditions from any mobile device — even in offline mode — and sync with FOUNDATION remotely.

Service Dispatch mobile® links service technicians to FOUNDATION's Service Dispatch Module and their work sites. Navigate to assignments, clock in and out, and send job notes, inventory usage and more back to the office.

eACCESS

With Foundation eAccess, employees have their payroll data at their fingertips! Let employees securely access check stub information, payroll history and more, all through their own personal login.

ADDITIONAL MODULES

Foundation Software's additional modules allow you to customize your product for what you need.

- Inventory
- Document Imaging
- Time & Material
- Unit Price Billing
- Equipment
- Consolidated General Ledger
- Service Dispatch
- Scheduling
- PO/Subcontracts
- Fixed Assets
- Executive Dashboard

ADDITIONAL PRODUCTS

payroll⁴construction

Foundation Software provides a variety of products and services to best serve the construction industry.

Payroll4Construction helps simplify complex construction payrolls. Featuring free construction reports — like certified payroll, job costing, new hire and more — and the ability to handle prevailing wage and union compliance, Payroll4Construction can handle every stage of the payroll process.

ADDITIONAL PRODUCTS

PROJECT

ProjectHQ fully integrates with FOUNDATION® to make project management easier than ever before.

ProjectHQ is your single source for total project control, with:

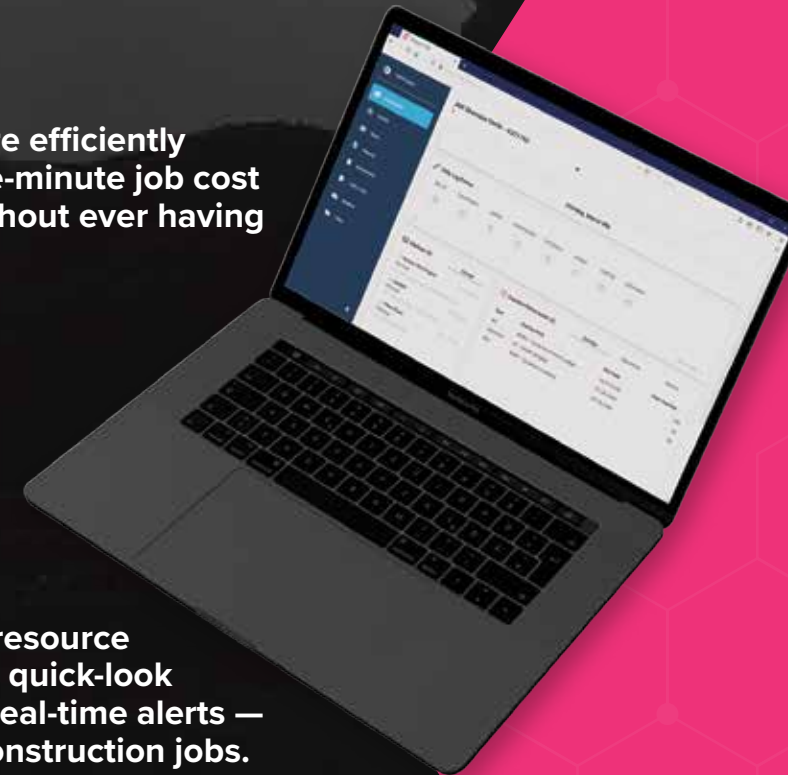

- Change Order Management
- Customizable Project Dashboards
- One Unified System for Managing Projects
- Variety of Integrations

EXECUTIVE

ExecutiveHQ helps manage job cost more efficiently with. Project managers can get up-to-the-minute job cost data with comprehensive drilldowns, without ever having to access the accounting system.

CREW

CrewHQ serves as a labor dispatch and resource management tool for contractors. With a quick-look dashboard, job-specific scheduling and real-time alerts — CrewHQ simplifies managing multiple construction jobs.

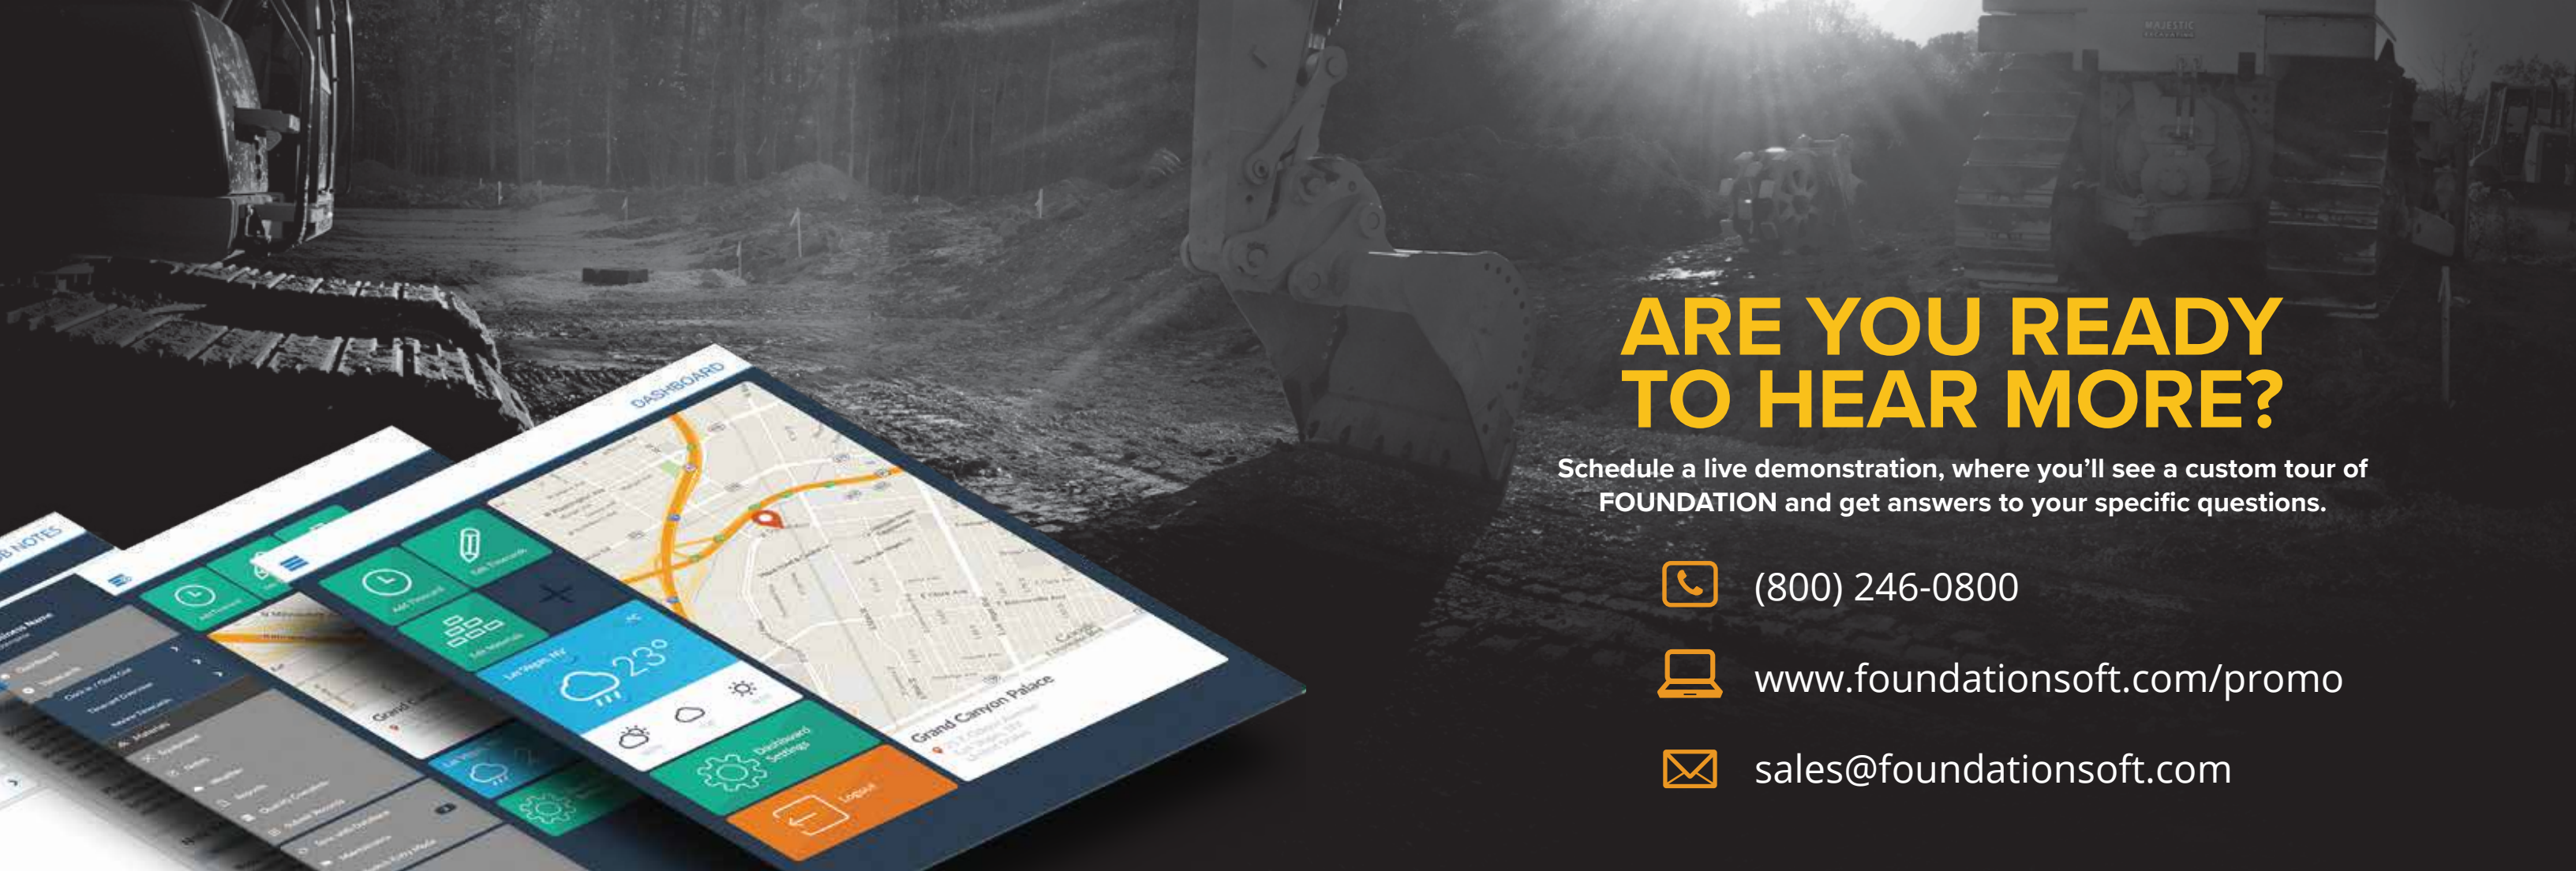

ADDITIONAL PRODUCTS

Foundation Software added McCormick Systems, the nation's leader in estimating and digital takeoff for the electrical, plumbing and mechanical fields, to its family of products in 2021.

WITH THE INTEGRATION BETWEEN MCCORMICK AND FOUNDATION, USERS CAN:

- Use one, centralized location to house all pertinent job details
- Update material lists, item descriptions and more by syncing data directly to FOUNDATION
- Obtain up-to-date budget and job cost information across all projects
- Reduce the risk of human error and increase the accuracy of data by eliminating the need to enter data multiple times
